LOAD MANAGEMENT CONTROLLERS

Receive a 10% discount on your electric usage for the months of June, July, August and September by signing up for a load controller. This controller allows the electric power provider to interrupt the central air conditioner unit during periods of high summer peak demand for residential customers.

There is no cost to the customer.

Installing Solar Panels?

In compliance with the adopted rules relating to cogeneration and small power production, the City of Kasson encourages interested co-generators and small power producers to learn how to connect with the city's electric distribution system.

Public power customers can look to their trusted local electric utility for advice on how to interconnect and distribute electricity from small power production or co-generation facilities that use solar, wind, or other fuels. Follow the link to learn more about the process and requirements that make safe, reliable connections possible when sending excess generation into the grid from these qualifying facilities (QFs).

For the City of Kasson for any utility customer to install solar panels

- 1) a building permit is required, and,
- 2) your project must be applied for through your electric service provider (within the City of Kasson, you may be in City of Kasson, Xcel, or Peoples Coop service territory).
- 3) If you are a City of Kasson electric customer, the solar application
